Smith-Magenis Syndrome Growth Measurements

The SMS Research Team at the National Institutes of Health headed by Ann C.M. Smith, M.A., D.Sc.(Hon) is trying to develop growth curves for Smith-Magenis syndrome. If you would be willing to share growth data on your child with SMS, please complete the following form.

I give my permission to PRISMS to share my child's growth data with Ann C.M. Smith, M.A., D.Sc.(Hon), to be added to the SMS dataset on growth measurements being compiled by the SMS Research Team, National Institutes of Health.

My child is: _____ Birthdate _____ Current Age_____

Diagnosis confirmed by (check): ❑ Chromosome study ❑ FISH analysis ❑Other

Signed_____ Date_____

***INSTRUCTIONS**:*

*Please write down the **date** and/or **approximate age** of your child for each measurement included. If you don't have all three measures for the same date, list them separately, but include the date or age for each measure on the form. Where possible include height and weight measurements for the same age. Please make copies of the form is more space is needed. Measurements for the 1st year of life can be in months (e.g., 1 month, 2 months, etc.) and yearly (e.g., annual physical exams) after that is fine.*

Thank you for your participation in this effort.

Measurement Date	**AGE**	**Height (inches) 1" = 2.54 cm**	**Weight (pounds) 1 lb. = 0.45 Kg**	**Head circumference (inches) 1" =2.54 cm**
BIRTH				

PLEASE mail or fax completed form(s) to:
